

## The Hub of Innovation and Productivity at Quorum

Quorum teamed up with the video collaboration experts at Whitlock to improve remote teaming, training, productivity, and customer service using Microsoft technology. With the help of Whitlock, we can now work better together from anywhere with the Microsoft Surface Hub and Skype for Business.

The Microsoft Surface Hubs at Quorum serve as engaging environments for in-person and remote meetings with customers, and we also use them for internal training on important solution updates. With Skype for Business and Microsoft Teams, Quorum engineers improve productivity, innovation, and responsiveness. And we are encouraging our internal and external customers to use Microsoft collaboration technology in their work environments too.
